Education

Arab Britain Open University (AOU)

Bachelor of Science in Artificial Intelligence and Data Science

Sep 2021 – Jun 2025

New Cairo, El Shorouk City, Egypt

Wichita State University

Non-degree Exchange Program in Computer Programming: Optimization for Engineers

Sep 2023 – Jan 2024

Wichita, Kansas, USA

Work Experience

Vosyn

Jan 2025 – Present

Machine Learning Engineer (Part-time, Remote)

Canada

- Assisted in designing and developing advanced AI models and algorithms to enhance system performance.
- Conducted data analysis and preprocessing to optimize datasets for model training and improve accuracy.
- Collaborated with cross-functional teams to refine existing AI systems and streamline workflows.
- Engaged in research and experimentation to innovate machine learning processes and enhance automation efficiency.
- Contributed to content creation for AI and ML learning materials and internal documentation.

STEM Club

Jun 2025 – Present

Software Programming Instructor (Part-time, Remote)

Nasr City, Egypt

- Designed and taught beginner-friendly courses in Python and Artificial Intelligence.
- Created and managed course content, ensuring clarity and engagement for students.
- Focused on making programming accessible and fun through games, interactive sessions, and real-world examples.
- Delivered workshops on data structures, logic building, and project-based learning.

Al Badr Smart Systems Company

May 2024 – Present

Artificial Intelligence Team Leader, Backend Developer (Hybrid / On-site)

Mansoura City

- Led the Artificial Intelligence team in developing and deploying AI-driven solutions to support business operations and automation.
- Designed and implemented backend systems and APIs integrated with accounting and warehouse platforms for automated financial reporting.
- Developed an intelligent reporting system that analyzes warehouse and financial data to generate insights and recommendations.
- Applied AI and data-driven tools to optimize performance, streamline workflows, and improve decision-making processes.
- Used Python, SQL, Power BI, and Excel to collect, clean, and visualize company data for management insights.
- Researched and tested AI solutions using tools such as LangChain, Tesseract OCR, and OpenAI APIs to improve document automation.
- Conducted internal workshops and staff training sessions on the use of AI-powered business tools.

Grand Community Company

Feb 2024 – Jun 2024

Data Analyst & Tech Lead

Mansoura City

- Led the technical development of internal systems and tools to enhance operational efficiency.
- Analyzed company data to generate actionable insights for decision-making and performance improvement.
- Developed and maintained automated dashboards and reports using Excel and SQL.
- Provided technical guidance and support to the operations team to ensure seamless workflow execution.

Projects

Disease Prediction from Medical Data | *Python, NumPy, Pandas, Matplotlib, Scikit-learn*

May 2024

- Built a system that predicts the likelihood of diabetes using Support Vector Machine (SVM) and patient medical data.
- Performed data preprocessing, model evaluation, and accuracy tuning through cross-validation.

Robotic Process Automation Project | *UiPath, Power Automate, Python*

Jan 2024

- Automated web data scraping tasks to collect celebrity data from social media platforms.
- Developed bots to read unread emails, download attachments, and organize them automatically in designated folders.

Intelligent Invoice Reader (NLP System) | *Python, Tesseract OCR, SQL, OpenAI API, LangChain*

Aug 2024

- Developed a system to extract structured data (invoice number, date, items, and totals) from Arabic invoices using OCR and natural language processing.
- Integrated FastAPI backend with a SQL database and export features to Excel for data review and modification.
- Enhanced user interface to allow clients to view, edit, and download financial reports.

AI-Powered Financial Insights Report | *Python, SQL, Power BI, OpenAI API* **Oct 2024**

- Created an automated financial reporting system that analyzes warehouse and transaction data to detect anomalies and suggest actions.
- Used OpenAI API to generate human-readable summaries and insights for business decision-making.
- Integrated with internal systems at Al Badr Smart Systems for real-time data tracking.

AI Workflow Automation and Content Generation | *Python, LangChain, OpenAI API, Notion API* **Oct 2024**

- Developed automated workflows for AI-driven content creation and course structuring as part of Vosyn's learning platform.
- Integrated OpenAI API and LangChain pipelines to generate structured educational content for AI and software courses.

- Collaborated with the content and engineering teams to optimize knowledge delivery and streamline internal operations.

Technical and Non-Technical Training and Skills

HCIA-AI Certification (85% Score) | *Huawei – NTI, Egyptian Talent Academy* **Feb 2025**

- Successfully completed the 80-hour Artificial Intelligence track powered by Huawei, held at the Egyptian Talent Academy in collaboration with NTI, Mansoura Branch.
- Gained hands-on experience in Machine Learning, Deep Learning, and AI applications for real-world problem-solving.
- Grateful to Huawei Egypt's leadership for empowering youth through innovative and practical AI education.

AI & Data Science - Digital Egypt Pioneers Initiative (DEPI) | *MCIT* **2024**

- Specialized training in AI, machine learning, and data science using Python, SQL, and visualization tools.
- Focused on practical projects involving data analysis, model development, and deployment.

Be an Ambassador Initiative (Batch 4) | *National Institute for Governance and Sustainable Development* **2024**

- Focused on sustainability, leadership, and governance for youth empowerment and policy awareness.

Machine Learning Virtual Internship | *CodeAlpha* **April 2024**

- Hands-on experience in data preprocessing, model implementation, and deployment using TensorFlow and PyTorch.

18-Hours SoftwareAI Training Program | *Mansoura University* **February 2024**

- Gained practical knowledge in Python, Pandas, visualization, regression, and classification.

Software Engineer Internship | *Orange Digital Center* **August 2023**

- Completed desktop app development training with hands-on experience in C++, OOP, and design patterns.

Data Science and Business Analytics Intern | *The Sparks Foundation* **February 2022**

- Worked on real datasets using Python and R for analysis, visualization, and business insights.

Specialized Technical & Strategic Programs | *IBM, Nasser Academy, Aspire Leaders Program* **2021–2023**

- Covered Quantum Computing, Leadership Principles, and National Security Strategy.

Leadership & Volunteering

Innovation Ambassador | *Technology Innovation and Entrepreneurship Center (TIEC)* **2024**

- Selected among youth innovators to promote technology-driven entrepreneurship and digital innovation in Egypt.

Artificial Intelligence Core Team Member | *Microsoft Student Club – AOU* **Nov 2023 – Dec 2024**

- Prepared and delivered lectures on Artificial Intelligence, Data Structures and Algorithms, Machine Learning, and Linear Regression for over 350 undergraduate students both offline and online.
- Served as a supervised, non-supervised, and intensive instructor, delivering weekly lectures and providing instruction to 150 students.

Volunteer Organizer – Modern Pentathlon World Championship **2023**

- Contributed to organizing international sports events, coordinating logistics, and managing athlete support teams.

Organizer – World Urban Forum 12 (WUF12) **2024**

- Assisted in organizing and coordinating sessions focused on urban sustainability and youth engagement.

Youth Interfaith Leaders Fellowship on Climate Change (Accepted Fellow) **2025**

- Collaborating with international youth leaders on sustainability and interfaith climate action initiatives.
